

Actor portrayal

Take the lead on your hereditary angioedema (HAE)

A guide to help you manage your HAE with EKTERLY® (sebetralstat).

WHAT IS EKTERLY® (sebetralstat)?

EKTERLY is a prescription medicine used to treat sudden (acute) attacks of hereditary angioedema (HAE) in adults and children aged 12 years of age and older. It is not known if EKTERLY is safe and effective in children under 12 years of age.

IMPORTANT SAFETY INFORMATION

Before taking EKTERLY, tell your healthcare provider about all of your medical conditions, including if you:

- Are pregnant or planning to become pregnant. It is not known if EKTERLY can harm your unborn baby.

Please see additional Important Safety Information throughout and click here for full [Prescribing Information](#), including [Patient Information](#).

Actor portrayal

Starting off on the right foot

As you become more independent, things change—whether it’s a new school, work, or even moving away from home. As you settle into new routines and begin to take more ownership of your treatment, it’s important to understand what you might need to manage your HAE attacks. And having the right tools and resources will help you feel more confident in taking control of your own health.

IMPORTANT SAFETY INFORMATION (continued)

Before taking EKTERLY, tell your healthcare provider about all of your medical conditions, including if you:

- Are breastfeeding or plan to breastfeed. It is not known if EKTERLY passes into your breast milk. Talk to your healthcare provider about the best way to feed your baby while taking EKTERLY.
- Have liver problems.

Here are a few helpful tips:

Know your HAE triggers

Track what tends to set off attacks for you—stress, sports, illness, etc.

Be prepared

- Always have at least 2 doses of EKTERLY on hand to treat attacks
- Be aware of the locations of the closest emergency services, whether you’re at home, school, or traveling

Don’t delay treating an attack

- You know your body best, so if you’re experiencing an attack, take one dose (2 pills) as soon as you can
- You may take a second dose after 3 hours, with no more than 4 pills in 24 hours

Speak up

Be sure those in your care circle (school nurses, teachers, coaches, friends, partners, etc.) understand your HAE, what an attack may look like, and what to do, or where to find your EKTERLY if necessary.

Store EKTERLY for easy access

Ensure that EKTERLY is stored at room temperature and easily accessible—in a purse, backpack, pocket, or small med pouch.

Getting to know EKTERLY

EKTERLY is the first and only oral treatment for HAE attacks—approved for ages 12 and up.

EKTERLY is a needle-free way to stop your attacks from getting worse—with no preparation needed. You can carry it with you and take it to stop your attacks fast—**anytime, anywhere you are.**

- In a clinical study, most teens (ages 12-17) who took EKTERLY started to feel better in a median time of **1.8 hours**
- Teens in the same trial were able to treat their attack within a median time of **9 minutes** after they felt attack symptoms
- **94%** of attacks that were effectively treated with EKTERLY required just **1 dose**
- You can take EKTERLY for **any type of HAE attack**, no matter where it shows up

Not actual size

If you're experiencing a throat (laryngeal) attack:

Seek medical care immediately (call 911) and take EKTERLY as directed. These types of attacks can be life-threatening and need immediate medical attention.

Actor portrayal

My HAE readiness checklist

- ☒ I always carry my personal ID, medication, and emergency contact information on me
- ☒ I have my current insurance card with me
- ☒ I understand my treatment plan and how/when to take my medication
- ☒ I've told key people (school nurse, coach, teachers, friends, boss) about my condition
- ☒ I know how to contact my KalVista Cares™ Care Manager (see next page)

IMPORTANT SAFETY INFORMATION (continued)

Tell your healthcare provider about all of the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Taking EKTERLY with certain other medicines can cause side effects or affect how well EKTERLY or the other medicines work. Especially tell your healthcare provider if you take any of the following, as their use with EKTERLY is not recommended: itraconazole, phenytoin, efavirenz.

KalVista Cares™ is a personalized patient support program for people taking EKTERLY

Your next dose is already in reach. From enrollment to refill, we're with you every step of the way.

As you take the lead in managing your own HAE care, get to know your dedicated Care Manager—they're here to assist you. Your Care Manager is committed to providing personalized, ongoing support, so it's important to stay in contact with them.

Your dedicated Care Manager can:

Work with your specialty pharmacy and your insurance provider to help ensure you receive EKTERLY

Connect you to educational resources and HAE advocacy groups

Help you enroll in the KalVista Cares Co-pay Assistance Program*†

Help you understand your insurance coverage and out-of-pocket costs

*Terms and conditions apply. Please visit EKTERLY.com/GettingEKTERLY for more details.

†IMPORTANT NOTICE

This co-pay assistance program is intended only for eligible patients with commercial (private) insurance. Patients with government-funded insurance, such as Medicare, Medicaid, TRICARE, or any state or federal health insurance program, are not eligible to participate. Participation in the program is subject to eligibility requirements and program limits. The program may cover a portion or all of the patient's out-of-pocket costs up to a maximum amount determined by the program. Terms and conditions may change from time to time, or the program may be discontinued at any time without notice. By participating, patients agree to comply with all terms and conditions.

Do not miss out on coverage

Health insurance might not be the most exciting thing to think about—but it's essential in maintaining your EKTERLY prescription.

When to make sure you're covered and know the benefits that coverage supports:

- **Starting a new job**—Talk to your employer about insurance coverage, including when it starts and what is covered
- **Turning 26 years old**—When you turn 26, you most likely will lose coverage under your parents' insurance. It's important to find insurance for yourself, either through an employer-sponsored program or through government platforms such as the Health Insurance Marketplace
- **Parents enrolling in Medicare**—If your parents sign up for Medicare, you typically will not be eligible to stay on their plan. You'll need to find new coverage either through work or a government-sponsored plan

If you need to sign up for your own commercial insurance, keep in mind that open enrollment typically runs from **November 1 to January 15** each year.

If you ever have any questions about your insurance, your dedicated KalVista Cares Care Manager is available to help.

Questions about the KalVista Cares patient support program?

Our team is available **Monday-Friday, 8:30 am-8 pm ET**
